Mobile: +91 8299271168

LinkedIn: [linkedin.com/in/kshitijgupta2000](https://www.linkedin.com/in/kshitijgupta2000)

Leetcode: [leetcode.com/u/k\\_17/](https://leetcode.com/u/k_17/)

## Experience

### Goldman Sachs , Bengaluru | September 2025 - Present

Software Engineer

- Designed and built scalable **backend services** and a configurable **Reconciliation Framework** using **Java**, **Spring Boot**, **Apache Spark** and **Snowflake** to process and analyze heterogeneous financial datasets across enterprise-scale systems handling **200 million+** active records.
- Owned end-to-end development of **production-grade ETL workflows** using **Java**, **Apache Spark**, **SQL** and **Snowflake** to source datasets from multiple upstream systems to support business-critical analytics workflows.
- Architected and optimized a high-throughput **distributed backfill pipeline** using **Java** and **Apache Spark** to ingest and process **16 billion+** historical records from **HBase**, flatten nested datasets and generate optimized **Parquet** files on **HDFS** for downstream systems.
- Currently developing a **cloud-native backend platform** on **AWS** using **Cloud Fast Track (CFT)**, a wrapper over **Terraform CNAS**, to manage cloud infrastructure including **S3 buckets**, **IaC resources** and **AWS Glue jobs**.
- Built scalable **backend services and APIs** that execute high-volume **SQL transformations** in **Snowflake**, improve operational reliability and enable downstream analytics for enterprise financial systems.
- Collaborated cross-functionally with platform, infrastructure and data engineering teams to improve deployment workflows, operational reliability and scalability for enterprise backend systems.
- Improved operational efficiency and reduced manual analysis effort across enterprise financial workflows through scalable backend automation and distributed processing systems.
- Contributed to **production-grade distributed systems** with focus on **system reliability**, **operational excellence**, scalability and service quality.

### Nokia Solutions and Networks , Bengaluru | August 2023 - September 2025

Associate Software Engineer

- Engineered scalable **backend services and REST APIs** using **Java** and **Spring Boot** for Nokia Network Services Platform (NSP), a large-scale **SDN platform** managing lifecycle operations for **45,000+** routers.
- Worked on **Kafka-based distributed messaging systems** to stream and process router test results, enabling scalable asynchronous communication across distributed platform services.
- Contributed to **CI/CD pipelines** and **Kubernetes-based deployment** automation workflows, improving build reliability, deployment efficiency and operational stability for production services.
- Participated in troubleshooting production issues, performed **root cause analysis (RCA)** across distributed services and collaborated on reliability improvements to maintain **SLA-driven service stability**.
- Demonstrated a Proof of Concept (POC) for a unified intent model, reducing test implementation time by **40%-45%**, improving multi-vendor deployment capabilities and accelerating delivery timelines.
- Developed and enhanced scalable backend systems and **web applications** for **NFM-P** network management software to optimize router configurations, improve operational efficiency and support scalable network management workflows.

## Skills

**Languages** C++, Java, SQL, JavaScript

**Backend Development** Java, Spring Boot, REST APIs, Backend Services, Distributed Systems, Platform Services

**Cloud & Infrastructure** AWS, S3, AWS Glue, Terraform, CFT, Kubernetes, Docker, CI/CD, Linux, Cloud Services

**Data Engineering** Apache Spark, Snowflake, HBase, HDFS, Parquet, PostgreSQL, MySQL, MongoDB

**Messaging & Distributed Systems** Kafka, Distributed Messaging Systems, Scalable Backend Systems

**Subjects** System Design, Operating Systems, Data Structures and Algorithms, DBMS, Object-Oriented Programming, Computer Networks

## Education

Sir M Visvesvaraya Institute of Technology

Bachelor of Engineering - Computer Science and Engineering ( 2023 )

Bengaluru, India

CGPA: 9.5

## Achievements and Certifications

- Awarded **Business Excellence Award** with cash prize at Nokia
- Global Rank 9** in *Codechef June Long 2022*, Division 3
- Global Rank 24** in *Codechef April Long 2022*, Division 4
- 300+ problems solved on LeetCode
- Ranked among the **Top 5** academic performers in the Computer Science Engineering program.
